

Tax Credit-Certified Duct and Heat Pump and AC Companies for 2012

To be eligible for an Oregon Residential Energy Tax Credit, equipment must meet certain performance requirements and be verified by a tax credit certified technician. Following is a list of companies that employ tax credit certified duct sealing and heat pump/AC technicians. The Oregon Department of Energy provides this list for your convenience and only for the purpose of assisting Oregon taxpayers in obtaining a Residential Energy Tax Credit. Companies listed have technicians who have successfully completed training to install and test equipment and ducts. If you live in an area that is not served, please contact the Oregon Department of Energy toll-free at 1-800-221-8035.

The Oregon Department of Energy does not make any warranty, expressed or implied, concerning the construction, operation, installation or any other characteristic or feature of systems installed or worked on by the technician.

Technician Training

Heat pump/AC technicians who are interested in tax credit certified heat pump/AC technician training should contact Randy Larson, Project Manager with Proctor Engineering, at (toll-free) 1-888-455-5742 ext. 118 or PTCS go to www.ptcsnw.com or call (800) 941-3867. Duct leakage testing and sealing training is sponsored by PTCS (see above). Technicians must be listed with PTCS in order to be certified.

Becoming a Tax Credit Listed Company

HVAC companies can become tax credit listed so that the installation of eligible equipment qualifies for the Oregon Residential Energy Tax Credit. To get listed, the company must employ technicians trained by PTCS or CheckMe program (see above) and key personnel from the company must participate in a short conference call training. For more information see the HVAC Technician Information on our web site or call us.

625 Marion Street NE, Salem, Oregon 97301
