

BUSINESS ENERGY TAX CREDIT (BETC) PROGRAM

11/19/2010

Final Certificate Activity (Excludes Denied, Inactive, Withdrawn, Rejected, and Fully Revoked Projects)

Sorted by Year and By System

1/1/2000 through 12/31/2009

Every effort has been made to ensure the data are complete, but these records reflect information reported to this agency by others. The Oregon Department of Energy is not responsible for data that are misinterpreted or altered in any way.

If errors are discovered after publication of the records, the data are corrected in the electronic files. It is estimated that there is a margin of error of less than one percent.

Final Projects Completed

Year	System*	Number	Final Project Costs	Tax Credits**
-----	-----	-----	-----	-----
2000				
	Conservation	234	16,697,403	5,844,102

-----	-----	-----	-----	-----
Totals		13,799	\$1,453,667,582	\$583,385,503

* System categories are assigned when a project is precertified.

** This report calculates tax credits issued and may differ slightly from the tax credits allowed due to rounding. The tax-credit rate depends on the system type and the project completion date. Tax credits for Homebuilder Projects (classified as Renewable-Energy projects) are determined on a case-by-case basis. Other Renewable-Energy projects and High-Efficiency CHP projects completed after 12/31/2006 qualify for a 50% tax credit. Some projects have split types and tax credits. All other projects qualify for a 35% tax credit.
